

(Amendment B)

## Specification :

1. Please add to the specification of my application, the section enclosed, titled: "DETAILED DESCRIPTION OF THE INVENTION (the application never had one).
2. Please omit the sentence in the "Detailed Description of the Drawings" of the line 7 and 8, that says: "The gear case 9 having a bevel gear 11, fixed /splined to it's other end. It is a duplicate of a sentence in line 5.

(Amendment C)

## Drawings :

1. Please make the drawing changes indicated (in red); of the inclosed drawing.

## Requests :

1. Change my mailing address to the following:  
(3 forms included)

Gary C. Johnson  
2064 Lafayette  
Det. MI 48207

2. Include in the application submitted on, 12-12-2001, the "missing" part of the spicification titled: "DETAILED DESCRIPTION OF THE INVENTION", presumably after the part titled: "Detailed Description of the Drawings".

## Requests (cont.)

3. Please renumber all the pages of the application / specification, where necessary.

4. It was an oversight that the application was processed without a complete specification. This could have been mentioned in the first office action (regarding complete payment).

Therefore an excess amount of time was lost, through no fault of my own. I can only imagine the burden of your office. I really appreciate the help that I have already received. It was invaluable. I have a much better understanding of the patent process, and more appreciation of it.

Nevertheless, because of the oversight, I request that the processing of this application be expedited.

Further more I am sure that your office can concede, that I am allowed any reasonable changes of my application, based on the "missing part" of the specification. "Missing", being for whatever reason.

## Remarks :

Concerning the reference cited of: Borgudd (5,176,589). First of all Borgudd is claiming a "controllable" differential. Anything can be made, to be made controllable. A string on a balloon makes it controllable. But even worse, is the idea of a string on a balloon, that has gone flat. If something isn't workable, then why should it be controlled. In other words; something that is invented
